**Subject:** P samples/testing

Bert,

Attached is a list of P testing done by the Tahlequah Public Works for a limited time period. I obtained this today when interviewing the general manager. They were not required to test but did so. The waste water facility tests for this also. They are copying for us the THM testing reports that they have in their records also. They are more than willing to allow us to draw samples from their facility during this high P/algae period. As you know, they are only required to test quarterly for THM. We will have the ability to test as often as we deem necessary. I have the contact information. Let me know your thoughts. Should I contact Roger to follow through? Rick
